CAREER OBJECTIVE

To secure an entry-level software developer position in a reputable IT company, where I can leverage my technical skills and contribute to the development of high-quality software solutions while continuing to learn and grow in the field.

TECHNICAL SKILLS AND INTERESTS

Programming Languages: HTML5, CSS3, JavaScript (ES-6), DOM Manipulation
React : ReactJs, React Router, Context API, API Integration, React-redux
Backend : Node.js, Express.js, REST APIs
Database: MongoDB, Sql
Tools and Platforms: Git, GitHub, VS Code, Postman, npm, vite
Frameworks: Bootstrap, Tailwind
Libraries: Nodemailer, jwt, bcrypt, cors
Soft Skills: Problem Solving, Self-learning, Team Work, Time Management, Adaptability

EDUCATION

• Master of Computer Application	2022-24
DDCE, Utkal University	CGPA: 7.29
• Bachelor of Science	2019-22
Pipili Degree College, Utkal University	CGPA: 7.74
• Intermediate in Science	2017-19
Pipili Junior School, Utkal University	Perc. :57
• Matriculation	2016-17
Pipili High School	Perc. :73

PERSONAL PROJECTS

• Online Shopping Website (MERN Full-stack)

React.js, Node.js, Express.js, MongoDB, Tailwindcss, Redux Toolkit, JWT, Bcrypt, Cloudinary

- Developed a full-stack e-commerce application using the MERN stack (MongoDB, Express.js, React, Node.js) with a responsive and user-friendly interface. Designed a scalable backend using MVC architecture with optimized database queries and media handling via Cloudinary.
- Enables users to register, browse, search, add to cart, and purchase products across various categories.
- Provides an admin panel to manage product categories, products, customer details, and track customer orders efficiently

• ProNote Secure Note Management System (MERN Stack)

React.js, Node.js, Express.js, MongoDB, JWT, Nodemailer

- Developed a full-stack note management platform with secure frontend-backend integration using RESTful APIs.
- Implemented user authentication and password-protected notes to ensure data privacy and controlled access.
- Built complete CRUD functionality for creating, updating, and securely retrieving encrypted notes with email-based verification.

• Additional Frontend Projects

Reactjs, Tailwindcss, html, css, javascript

- **Food Delivery Website :** A responsive food ordering web application with menu browsing, cart functionality, and order placement UI built using React.js, HTML, CSS, and JavaScript.
- **CinemaVault – Movie Library Application :** An API-driven movie discovery platform featuring live search, genre filtering, and dynamic UI built with React.js, Tailwind CSS, and REST APIs.
- **STORE - API-Based Products Application :** A product listing and filtering web app that fetches real-time data from external APIs and displays searchable, category-based results using React.js and JavaScript.
